

NOTICE

Directives received from our attorney outlines measures a Board should take in view of the highly contagious COVID-19 virus.

It is our desire to keep the pool, bath-house and laundry room open for the enjoyment and convenience of our unit owners/residents/and registered guests. Our maintenance crew has been disinfecting/ wiping down the pool furniture, as well as the bath-house and laundry facilities early each morning. It should be noted, however, that use of the pool, bath-house and/or laundry is at your discretion and as such, the Board/ Association will not be responsible for any virus or bacteria issues you may experience as a result of your using these facilities.

In view of the directives coming from Governor DeSantis and the National COVID-19 Committee, the Board is requesting that you follow established guidelines by washing hands frequently and practicing social distancing.

We are, also, requesting all who utilize the pool do their part by self-imposing the 6 ft. distance between participants. Further, it is desirable that no more than 10 individuals be in the pool at any given time. Monitoring of this suggested limitation can be by those who regularly use the pool.

As always, we appreciate your cooperation.

The Board of Directors
